

ExponentialFlow::ExponentialFlow

ExponentialFlow::operator=

ExponentialFlow::~~ExponentialFlow

ExponentialFlow::ExponentialFlow

```
graph LR; A[ExponentialFlow::ExponentialFlow] --> D[ExponentialFlow::ExponentialFlow]; B[ExponentialFlow::operator=] --> D; C[ExponentialFlow::~~ExponentialFlow] --> D;
```

The diagram illustrates a mapping or transformation process. On the left, there are three separate boxes, each containing a C++ identifier: 'ExponentialFlow::ExponentialFlow', 'ExponentialFlow::operator=', and 'ExponentialFlow::~~ExponentialFlow'. On the right, there is a single, larger box with a gray background, also containing the identifier 'ExponentialFlow::ExponentialFlow'. Three blue arrows originate from the right side of each of the three left boxes and point towards the left side of the gray box on the right, indicating that these three distinct identifiers are being mapped or transformed into the single identifier within the gray box.
